

EERC Learning Management System (LMS) User Manual

Welcome

Welcome to the **EERC Learning Management System (LMS)**.

This guide will help you learn how to use the system whether you are a **Student** or an **Administrator**. Each section explains what a feature is for and how to use it step by step.

For technical setup and deployment, see [DOCUMENTATION.md](#).

1. Getting Started

Sign In

The sign-in page is where you enter the system with your account.

1. Open the EERC LMS website.
2. Click **Sign In**.
3. Enter your email and password.
4. Click **Sign In**.

After logging in:

- **Students** are redirected to the **Programs** page.
- **Administrators** are redirected to the **Dashboard**.

Note: Only one active session is kept per account. Signing in on another device may sign you out elsewhere.

Register

Registration lets you create a new student account when your organization allows it.

If registration is available:

1. Click **Create Account** (from the sign-in page).
2. Fill in your information.
3. Submit the registration form.

New accounts are automatically created as **Student** accounts.

If registration is unavailable, contact an administrator to create your account.

Log Out

Logging out ends your session and keeps your account secure on shared devices.

1. Open the left sidebar.
 2. Scroll to **System Setting**.
 3. Click **Log Out**.
-

2. Student Guide

Programs

The **Programs** page is your main home in the LMS. Here you can see every program offered by EERC and manage your enrollment in one place.

From this page you can:

- Browse available programs
- See each program's **enrollment fee**
- Apply for enrollment
- Check your enrollment status

- View your payment history
- Pay remaining balances
- Open courses after you are approved

Enrollment Status

Each program card shows where you are in the enrollment process:

Status	What it means
Not Enrolled	You have not applied yet.
Pending	Your application was submitted and is waiting for review.
Approved	Your enrollment is accepted — you can access courses.
Hold	Your application is paused — contact the office for details.
Rejected	Your application was not accepted.

How to Apply for Enrollment

When you are ready to join a program, the system guides you through **6 easy steps**. Take your time on each step — you can go back before submitting.

Step 1 – Enrollment Details

Choose how and where you will study:

- **Batch** — your intake or class group
- **Learning Mode** — how the program is delivered
- **Branch** — which campus or location
- **Review Schedule** — your preferred review schedule

Click **Next**.

Step 2 – Personal Information

Enter your personal details so the office can process your application:

- Full Name
- Birthday
- Gender
- Address
- Contact Number

- School Name

Click **Next**.

Step 3 – Upload Documents

Upload files that support your application:

- **Profile Picture**
- **Discount or Scholarship Documents** (if applicable)

Click **Next**.

Step 4 – Payment Information

Tell the office about your exam and first payment:

- **Board Exam Information**
- **Down Payment Amount**
- **Payment Receipt or Proof of Payment** (upload a clear photo or scan)

Click **Next**.

Step 5 – Package & Agreement

Choose your package and confirm you agree to the terms:

- Select your **package**
- Provide your **signature**
- Read and accept the **Terms and Conditions**

Click **Next**.

Step 6 – Review & Submit

Check everything one last time on the summary screen.

If all information is correct, click **Submit**.

Your enrollment is sent to an administrator for review. You will be notified when your status changes.

Paying Your Remaining Balance

After enrollment, you may still owe part of the program fee. You can submit additional payments from your program card without re-applying.

If you still have a balance:

1. Open your enrolled program on the **Programs** page.
2. Click **Pay Remaining Balance**.
3. Enter the payment amount.
4. Upload your payment receipt or proof.
5. Submit.

Your payment will show as **Pending review** until an administrator verifies it.

Payment Status

Every payment you submit has a verification status. Only approved payments reduce what you still owe.

Status	Meaning
Pending review	Waiting for an administrator to check your receipt.
Correct	Payment accepted — it counts toward your balance.
Invalid	Payment rejected — it does not reduce your balance.

Only **Correct** payments reduce your remaining balance.

Payment History

Payment history shows every payment linked to your enrollment so you can track what you have paid and what is still under review.

You can view:

- Down payment
- Additional payments
- Payment dates
- Payment status (Pending review, Correct, or Invalid)
- Uploaded receipts

Open payment history from your program card on the **Programs** page.

Profile

Your profile stores your account information. Keeping it updated helps the office reach you and keeps your records accurate.

Go to **System Setting** → **Profile** (</settings>).

You can edit:

- First Name
- Last Name
- Contact Number
- Birthday
- School Name
- Password (optional)

Click **Save Changes** after updating your information.

Tip: Contact Number and Birthday are required before you can save.

Courses

Once your enrollment is **Approved**, you can open courses inside that program and start learning.

Each course may include:

- **Text lessons** — read content in the browser
- **Video lessons** — watch lesson videos
- **Quizzes** — answer questions and see your score
- **Assignments** — submit work for grading

Open a course from your approved program on the **Programs** page.

Quizzes

Quizzes help you test what you have learned. Some quizzes have a time limit, so finish before the timer runs out.

From **Quizzes** in the sidebar you can:

- Take available quizzes
- View your scores
- Review previous attempts in **Quiz history** (</quizzes/history>)

Some quizzes also show a **Leaderboard** where you can compare scores with other learners.

Assignments

Assignments are tasks you complete and submit for grading. Check due dates so you do not miss a deadline.

From **My Assignments** in the sidebar you can:

- Read assignment instructions
- Upload or submit your work
- View grades and feedback when graded

Some assignments include a **Leaderboard** for top scores.

Notifications

The notification bell (top of the screen) alerts you when something important happens in the system.

You will receive notifications when:

- Your enrollment status changes
- Your payment is verified (marked **Correct** or **Invalid**)
- A new announcement is posted

Click a notification to read it. Mark it as read when you are done.

3. Administrator Guide

Dashboard

The **Dashboard** is the administrator home page. It gives you a quick snapshot of how the LMS is being used.

The dashboard shows an overview of:

- Programs available
 - Enrollments
 - Students
 - Learning activity
-

Manage Enrollments

The **Enrollment** page is your inbox for student applications. Review each application before students can access courses.

From **Enrollment** → **Enrollment** (</enrollment>) you can:

- Review applications
- View submitted documents
- Open **Payment history** for a specific enrollment
- **Approve** applications
- Put applications on **Hold**
- **Reject** applications (you may be asked for a reason)

Tip: Verify down payments before approving when payment is required.

Verify Payments

Students upload payment receipts when they enroll or pay a balance. Administrators must verify each payment so balances stay accurate.

You can verify payments in two places:

1. **Enrollment** → **Payment history** (</payment-history>) — all payments across enrollments, with search and filters
2. **Enrollment** → **Enrollment** — open **Payment history** on a single application

For each payment, choose:

- **Correct** — payment is accepted and counts toward the balance
- **Invalid** — payment is rejected and does not count

Payments still waiting for review appear highlighted so you can find them quickly.

Only **Correct** payments count toward the student's balance.

Programs

Programs group courses together and set the **enrollment fee** students see when they apply.

From **System Setting** → **Programs** (</setting-program>) you can:

- Create programs
- Edit program details
- Set enrollment fees

- Activate or deactivate programs
-

Courses

Courses hold the actual learning content — lessons, videos, quizzes, and assignments.

From **Main** → **Add Courses** (course curriculum builder) you can create and manage:

- Modules
- Text and video lessons
- Quizzes
- Assignments

Publish courses when they are ready for students.

Gradebook, Quizzes & Assignments

These tools help you track how students are doing during the term.

Menu	What you do
Gradebook	View grades and student performance
Quizzes	See quiz attempts, scores, and leaderboards
Assignments	Review submissions, grade work, view leaderboards

Announcements

Announcements send messages to enrolled students. Use them for schedules, reminders, and important updates.

From **Communication** → **Announcement** you can create and publish announcements. Students see them in their notification bell.

Feedback

The **Feedback** inbox holds messages sent from the public **Contact Us** form on the website.

From **Communication** → **Feedback** (`/feedback`) you can read and follow up on visitor inquiries.

Students

Student accounts let learners sign in, enroll, and take courses.

From **System Setting** → **Students** (`/setting-student`) you can:

- Add students
 - Edit student information
 - Activate or deactivate accounts
-

Instructors

Instructor accounts are used for staff who teach or manage courses (when enabled in your setup).

From **System Setting** → **Instructors** (`/setting-instructor`) you can:

- Add instructors
 - Edit instructor information
 - Upload profile photos
 - Activate or deactivate accounts
-

Payment Settings

Payment settings tell students where to send money — bank accounts and e-wallet details shown during enrollment.

From **System Setting** → **Payment** (`/setting-payment`) configure:

- Bank accounts
- E-wallet accounts

Students use these details when making down payments and balance payments.

Enrollment Settings

These options control the choices students see in the enrollment form (batches, branches, packages, and more).

Under **System Setting** → **Enrollment** you can configure:

- **Batch enroll** — intake batches per program
- **Mode of learning** — delivery options
- **Branch to enroll** — campus or location choices
- **Review schedule** — review session options

- **Honors / awards / discount** — discount types
- **Package enroll** — package tiers

Changes appear automatically in the student enrollment wizard.

Website Content

Website content tools let you edit what visitors see on the public site without changing code.

From **Content Management** you can update:

Page	What you edit
Homepage	Hero, benefits, instructor showcase, sample lecture video, statistics, success stories, how it works, featured content
About Us	About page text and images
Contact Us	Contact page content

For each section you can set **Visible** on or off and save as **Draft** or **Published**.

Sample lecture: On the Homepage editor, use **Advertise Sample Lecture** to upload a sample video (MP4, WebM, or OGG) and optional poster image.

Use **Preview** on the live site with `?preview=1` while logged in to see drafts before publishing.

Analytics & Leaderboard

Analytics and leaderboard pages help you see engagement and top-performing learners.

- **Analytics** (`/analytics`) — summary metrics for programs, enrollments, and activity
- **Leaderboard** (`/leaderboard`) — daily, weekly, and overall rankings

4. Enrollment & Payment Process

Student Process

This is the full journey from applying to learning:

1. Submit your enrollment application (6 steps).
2. Upload your down payment receipt.
3. Wait for payment verification (**Correct** or **Invalid**).

4. Wait for enrollment approval (**Approved**, **Hold**, or **Rejected**).
 5. Access your courses after approval.
 6. Continue paying any remaining balance until fully paid.
-

Administrator Process

This is how staff handle enrollments from start to finish:

1. Review each submitted payment — mark **Correct** or **Invalid**.
 2. Check documents and application details.
 3. Approve, hold, or reject the enrollment.
 4. Verify future balance payments until the student's account is fully paid.
 5. Use **Payment history** to find unreviewed payments quickly.
-

5. Frequently Asked Questions

My enrollment is still pending.

Your application is waiting for administrator review. You will be notified when the status changes.

My payment is still pending.

Your payment has not yet been verified. An administrator must mark it **Correct** before it reduces your balance.

Why didn't my balance decrease?

Only **Correct** payments are deducted from your remaining balance. **Invalid** or **Pending review** payments do not count.

I cannot save my profile.

Make sure your **Contact Number** and **Birthday** are filled in before clicking **Save Changes**.

Why does "School held" show wrong text?

This field may show placeholder or legacy data. Contact the office if your school name looks incorrect.

Can I use the LMS on my phone?

Yes. The EERC LMS works on most modern mobile browsers (Chrome, Edge, Safari, Firefox).

Quiz timer ran out.

If the quiz had a time limit, your attempt may be submitted automatically when time expires. Check **Quiz history** for your result.

6. Need Help?

For enrollment or payment concerns, contact the **EERC Office** using the **Contact Us** page on the public website.

For technical issues, contact your **System Administrator**. Developers can refer to [DOCUMENTATION.md](#).

Quick Tips

For Students

- Complete all required information before submitting enrollment.
 - Upload clear, readable payment receipts.
 - Check your notifications regularly.
 - Keep your profile updated.
 - Submit quizzes and assignments before the deadline.
 - Only **Correct** payments reduce what you still owe.
-

For Administrators

- Verify payments before approving enrollments when payment is required.
- Review uploaded documents carefully.
- Use **Payment history** filters to find pending payments.
- Keep program fees and payment method details updated.
- Post announcements for schedule changes and reminders.
- Monitor student progress through the Gradebook.

- Publish CMS changes when drafts are ready — use preview mode first.

Thank you for using the EERC Learning Management System (LMS)!
